# PRO-SHOCK Waves

## THE MOST VERSATILE SHOCKWAVES EVER

- EXTREME FLESSIBILITY IN **CREATE COMPLEX PROGRAMS**
- **EXTREMELY REDUCED ENERGY** TRANSMITTED TO OPERATOR
- **EXTREMELY SIMPLE** TO OPERATE
- HUGE QUANTITY OF **PRESET PROGRAMS**
- POSSIBILITY TO **CREATE/SAVING** YOUR OWN PROGRAMS
- **E.S.A.® SYSTEM** (EXTREMELY SOFT ABSORBED SYSTEM)

AC International s.r.l.

# PRO-SHOCK WAVES

## (CYB.SHOCK) SHOCKWAVES THERAPY

**Pro-Shock Waves** incorporates a  $\mu$ -computer that provides almost infinite programming capabilities and allows the operator to enter the patient's data including information on the history and evolution of patient's disease.

A convenient external **USB** allows transfer of patient's data to an external database, as well as software updating.

The use of modern mechanical technologies applied to this machine guarantee the best quality of delivery of the shock wave on the patient. Furthermore, there are several energy transmitters with different focalizations, adopting the use of the machine to different types of application on the human body.

From sports injuries to chronic diseases and disorders requiring rehabilitation, the **Pro-Shock Waves** offers the ultimate technology in shockwaves and, with its wide range of pre-set protocols, provides highly effective results in the treatment of pain.

In addition to the large amount of preset treatment programs, through visualization of different anatomical areas, you can select all the treatments dedicated to a specific area of the human body.

The unique patented **E.S.A.® System (Extremely Soft Absorbed)** reduce the energy transmitted to the therapist up to the 90%. With its innovative and registered System, the Pro-Shock Waves provides unequalled parameter flexibility, allowing the therapist to reduce the energy and create the perfect combinations of parameters for each patient.

The **Pro-Shock Waves** has a unique, sophisticated design that ensures maximum functionality for a variety of therapeutic applications.

Rubber protection handle for non-slip and comfortable handhold.

### TECHNICAL DATA:

Number of output:	1
Power supply:	
- 230 Vac	50-60 Hz ( $\pm 10\%$ )
- 115 Vac	50-60 Hz ( $\pm 10\%$ )
Maximum power input from the mains:	80 VA
Double fuse protection on the mains:	
- 230 Vac	2x2 A-T - 5x20 mm
- 115 Vac	2x4 A-T - 5x20 mm
Indications:	Backlit graphic LCD display 640 x 480 pixels Touch Screen
Type of emission of the pulses:	Single, Continuous, Burst
Type of emission Burst:	(1 $\div$ 100) burst pulses (10 $\div$ 2000) ms pause between burst pulses
Pressure:	1 $\div$ 5 bar to step of 0.5 bar
Emission frequency:	1 $\div$ 25 Hz to step of 1 Hz
N. of pulses emitted:	0 $\div$ 10000
Operation:	- Constant Voltage - Constant Current
Weight:	8.2 Kg
Dimensions (LxWxH):	39 x 32.8 x 23 cm
Insulation class:	Class I - BF type

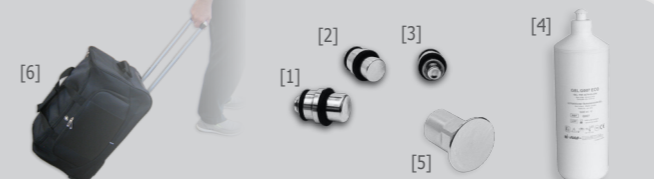

Handpiece part interchangeable with supplied transmitters.

### SPECIFICATIONS:

Pro-Shock Waves it is a very advanced product delivering radial shockwaves for therapeutical use. It is absolutely one of the most versatile device of the market:

- Patient Database
- Huge quantity of preset programs
- E.S.A.® System - This exclusive system reduce more than 90% of energy transmitted to the therapist during the tratment. This system works as a classic shock absorber and removes any problems from the transfer of energy from the handle to the therapist.
- Selection by anatomical area of the body
- Selection by medical branches
- Pulsed mode up to 25 Hz
- Pressure power up to 5 bar
- Possibility to create custom programs

### STANDARD ACCESSORIES:

1 pc. - 15 mm focused transmitter [1]	(J02.01560)
1 pc. - 15 mm multi-focused transmitter [2]	(J02.01561)
1 pc. - 9 mm focused transmitter [3]	(J02.01551)
1 pc. - Gel tube [4]	(R/273)

### OPTIONAL ACCESSORIES:

• 36 mm transmitter for aesthetic medicine [5]	(A01.00107)
• Evoline trolley	(A01.00056)
• Trolley bag [6]	(A01.00101)
